

Help, I found a kitten!

Don't know what to do?
Use the steps below to make the best decision for their care!

KITTEN CARE

Without mom, neonatal kittens need your help! Neonatal kittens require round the clock care, attention and bottle feeding.

KEEP WITH MOM

Let kittens stay with mom! She is their best chance at survival. When the kittens are old enough, TNR, foster or adopt them.

FIND NEW HOME

Take the kittens to a veterinarian for a medical exam and to be spayed or neutered. Then, find the kittens loving and safe homes.

TRAP-NEUTER-RETURN

At 12 weeks old, humanely trap the kittens for spay, neuter and vaccinations. Return them to the same area or colony.
